

# Rug Size Guide

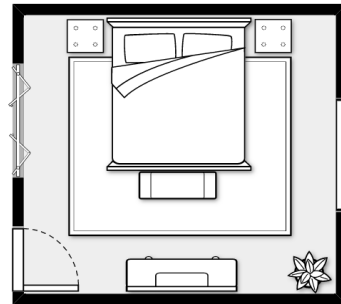

## KING BED

### 8'X10'

Nicely balanced rug size for a king bed. Place under the bed and nightstands to provide coverage on all sides of the bed.

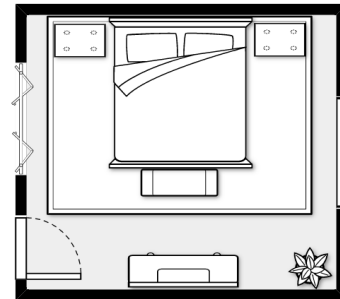

Place under the bed, but not under nightstands, to provide coverage for a bench at the foot of the bed.

### 9'X12'

This rug size provides the best balance and coverage on all sides of the bed. Place under nightstands, and still have coverage for a bench at the foot of the bed.

However, this size could be too large for a small room, interfering with furniture or door swing. This rug size is best suited to larger spaces.
